

Island Pest Control Services

Tired of trying to co-ordinate a service date and time with a Pest Control company that does not have their own boat(s)? Who wants to waste part of their weekend or summer vacationing days picking up a pest control operator and his/her application equipment at a Marina.

Allow us the privilege of coordinating with you to meet directly at your water access location. Leaving you more time to relax and not worry about chauffeuring a contractor back and forth.

We use one 18' boat with 90HP engine for rough water – long distance service requirements. Plus a smaller 15' boat with 40HP engine for short service trips.

Take advantage of the savings related to our client referral program. Our best service rates are available when multiple Island Properties can be coordinated during the same service date.

Contact us by phone or by e-mail to discuss this topic in greater detail. We look forward to helping you stroke one more chore off your to do list!
